Career Objective

Final-year B.Tech student in AI & Data Science (CGPA 8.79/10) with hands-on experience across three internships in data science, analytics, and full-stack development. Compared ML algorithms (XGBoost, Random Forest, Logistic Regression), addressed class imbalance, detected data leakage, and applied SHAP explainability. Built AI-powered apps using NLP, LLMs, and Generative AI alongside Django/React systems and Power BI dashboards. Seeking roles in Data Science, AI/ML Engineering, or Software Engineering.

Education

B.Tech in Artificial Intelligence and Data Science — KGiSL Institute of Technology *Sep 2023 – May 2027*
Coimbatore, Tamil Nadu | CGPA: 8.79/10

Higher Secondary (Class XII), Bio-Maths — Manickavasakar Higher Secondary School *Jun 2022 – May 2023*
Pudukkottai, Tamil Nadu | 89.5%

Experience

Data Analyst Intern — Elevate Labs *Aug 2025 – Oct 2025*

- Developed an XGBoost regression model to predict 12-month customer LTV from ~250K transaction records, engineering RFM/behavioral features with a log1p target and 70/15/15 split; evaluated with MAE, RMSE, R^2 , and applied SHAP for explainability.
- Performed PostgreSQL-based e-commerce analytics and built interactive Power BI dashboards; automated recurring data workflows with Python, reducing manual processing effort by 30%.

Data Science Intern — SkillCraft Technology *Feb 2025 – Mar 2025*

- Compared Decision Tree, Logistic Regression, and Random Forest classifiers on ~45K bank marketing records; addressed class imbalance and selected Random Forest (ROC-AUC: 0.925) over an accuracy-only baseline.
- Identified data leakage from an outcome-dependent feature and retrained a leakage-free model (ROC-AUC: 0.784) for a realistic, deployment-ready estimate.

Full Stack Intern — Appin Technology *Jun 2025 – Jul 2025*

- Designed relational database schemas and optimized SQL queries within a Django backend, improving data retrieval speed by 25%.
- Built responsive front-end interfaces with HTML5, CSS3, Bootstrap, and JavaScript, integrating end-to-end CRUD workflows.

Projects

CareerLens AI — AI Resume Analysis Platform / Python, Django, NLTK, Scikit-learn, SQLite

- Built a full-stack Django platform for AI-powered resume analysis, using NLTK to extract, sanitize, and tokenize unstructured PDF/DOCX text.
- Applied NLP and similarity-scoring techniques for ATS scoring, keyword analysis, and job-description matching.
- Automated generation of structured PDF analysis reports summarizing resume-to-job-description fit.

AI Cognitive Negotiation Agent / Python, LLMs, NLP, Generative AI

- Built a real-time data ingestion engine and multi-phase state-machine logic for an LLM-powered negotiation agent.
- Implemented BATNA/ZOPA calculations and sentiment analysis to drive automated, data-informed pricing recommendations.
- Added behavioral analysis logic so the agent adapts its negotiation strategy in response to counterpart behavior.

BillingERP — Desktop Billing & Invoice Management System / Electron, React, TypeScript, JavaScript

- Developed a desktop billing and invoice management application with invoice creation, bill preview, and print workflows using Electron and a React-based frontend.
- Built reusable invoice and bill-preview components with configurable layouts, and implemented A4/A5 print-ready formatting for consistent output across paper sizes and printers.

Technical Skills

Languages: Python, SQL, Java, JavaScript, TypeScript, C

ML & AI: Scikit-learn, TensorFlow, XGBoost, NLP, LLMs, Generative AI, NLTK, Regression, Classification, Clustering

Data & Evaluation: Pandas, NumPy, EDA, Feature Engineering, ROC-AUC, SHAP, Confusion Matrix, GeoPandas

Web & Backend: Django, React, REST APIs, HTML5, CSS3, Bootstrap

BI & Databases: Power BI, Tableau, Matplotlib, Seaborn, PostgreSQL, MongoDB, SQLite

Tools & Core CS: Git, GitHub, Jupyter, VS Code, Linux, ROS 2, DSA, OOP, DBMS

Certifications & Achievements

Certifications: Neural Networks and Deep Learning (DeepLearning.AI), Big Data with Spark and Hadoop (IBM), OOP in Python (Duke), IoT and AI Cloud Specialization (UC San Diego)

Achievements: NCC Cadet — Completed NCC 'B' and 'C' Certificates; active in hackathons and technical competitions
